

# Web Design Training

## Course Outline

# Introduction

This Web Design fundamental is for absolute newbies. This training will not walk you through the fundamentals of web design but also immerse you in the use of WordPress to create stunning websites using WordPress.

WordPress is a web design wizard! A new-age web design creator that helps you create a website with little or no coding experience. Since the use of WordPress, creating and owning a beautiful website has been fast, easy, and less expensive.

This training covers how to develop a website from start to finish with little or no coding experience. See the course outline for more info
